

## Overview

Established since 1975, Alhamrani Company for Industry (ACI) has become a leading manufacturer of red clay bricks used extensively throughout the Kingdom of Saudi Arabia and now has a 35% total share of the western province.

Based on the highest quality material and modern production techniques, ACI can also offer pre-manufactured lintels, wall panels, ceiling panels and staircases.

All the panel and staircase products are custom designed to individual client requirements and are delivered to your site ready for immediate installation. ACI products speed up your construction activities, save costs and ensure that the highest quality standards are maintained.

### High Quality Clay Deposits and Processing

Extensive deposits of high quality red clay were located in the Asfan area. The elasticity of the clay extracted eliminates the need for additives during the production process.

The combination of the high technology manufacturing process and excellent grade raw material has enabled (ACI) to produce a premium product that is renowned throughout the Kingdom for quality and conforms to international standards.

### Quality Control

Our highly automated production plant is subject to strict processing stages and a method of quality control. The final product is inspected with extreme care by using an advanced computerised system supervised by highly qualified technicians. Our red clay bricks not only conform to local and international standards, but also to our clients trust

### National Distribution Network

We are the first Saudi bricks manufactured to introduce poly-strap palletised delivery on site using crane-mounted vehicles. A fleet of over 75 vehicles, including more than 40 heavy-duty long haul trailers, makes ACI one of the Kingdom's largest haulers.

## Products

Alhamrani Company for Industry (ACI) has superior knowledge in the manufacture of clay bricks. ACI bricks have literally been the building blocks for quality infrastructure in the Kingdom of Saudi Arabia for more than 20 years. Based on the same top quality material and modern production techniques ACI has extended its offerings to pre-manufactured lintels, wall panels, ceiling panels and staircases.

### Bricks

- Extensive range of red clay bricks
- Hollow blocks, load bearing bricks, ceiling blocks
- Suitable for all building applications
- High grade raw materials
- High compressive strengths
- Delivered to site on schedule
- National distribution network
- International quality standards

### Ceilings

- Residential or commercial Buildings
- Max span 10.5m
- Fire proof
- High insulation properties
- No temporary supports
- Delivered to site on schedule
- No material waste
- 50% time saving

### Walls

- External and internal walls
- Perimeter walls
- Load bearing or non-load bearing walls
- Max 7m length x 3m height
- Delivered to site on schedule
- No material waste
- 50% time saving
- International quality control standards

## Lintels

- Residential or commercial buildings
- High load bearing capacity
- Pre-stressed concrete technology
- Delivered to site on schedule
- Immediate load application
- No material waste

## Stairs

- Precast concrete staircase
- Residential and commercial buildings
- Variable dimension for tread, riser and width
- Delivered to site on schedule
- Immediate load application
- No temporary supports
- 50% time saving
