

Overview

Alhamrani Real Estate Development Company (ARE) was established in 1992 as a provider of consultancy, design, marketing and management services to the construction industry. ARE is a stand alone entity, with its own management structure and redesigned business model, to serve the needs of its growing client base. Through collaborating and making use of existing expertise and resources of Alhamrani Company for Industry, ARE is on the path to becoming market leader in real estate development throughout the Kingdom of Saudi Arabia.

ARE has already developed a large multi-purpose office block in the heart of Jeddah's commercial district, and a new commercial centre is currently under construction, to be managed by ARE upon completion. We are also engaged in the final planning stages, of a residential compound consisting of forty villas, as well as an exclusive beach front resort.

Based upon the success enjoyed by ARE, we aim to further expand our services for the benefit of our clients and partners. In the coming year we plan to offer a property consultancy and listing service based on a comprehensive national data bank. This service will then be rolled out internationally through our strategic alliances with major European organisations.

Products

AREDC provides a comprehensive range of consultancy, design, marketing and management services structured to accommodate both in-house and joint venture property development projects.

The company also offers a wide range of pre-designed residential models to suit every housing need. AREDC can help our clients and business partners by building, supervising or just selling the desired designs. All of our designs are unique and categorised into three types: Mediterranean, Oriental and Modern.
